DX-CLUSIVE VUONNA 2002 (osa 2)

DXclusive ilmestyy tänä vuonna seuraavilla periaatteilla:

- **Nettclusiven** voivat tilata kaikki Suomen DX-Liiton jäsenet. Hinta on 10 € ja se tulee maksaa SDXL:n tilille 800010-487869 viimeistään ennen seuraavan DX-Clusiven ilmestymistä. Merkitkää maksun viitenumeroksi 123 (tämä on tärkeää, koska Sampo perii viitteettömistä suorituksista selvästi enemmän palvelumaksua; älkää laittako maksun yhteyteen tiedotteita, vaan lähettäkää ne sähköpostilla).
- **Paperclusive** tehdään kopioimalla vihkoseksi A5-kokoon. Pyrkimyksenä on edelleen päästä eroon paperiversiosta, koska se on työläs ja kallis nykyaikana. Paperiversion voi tilata Suomen DX-Liiton jäsen, joka täyttää clusiveringin kriteerit ja avustusvelvollisuuden. Hinta on 35 euroa, muut maksuohjeet kuten edellä.
- **Molemmat:** jos joku paperiversion tilaaja haluaa myös nettiversion, hinta on 40 euroa. Muut ohjeet kuin edellä.
- **Kommentit ja tiedustelut:** dx@jln.pp.fi ja risto.vahakainu@helsinki.fi. Työnjako on suunnilleen sellainen, että Jari hoitaa toimittamisen ja nettiversion tilaukset, ja Risto valvoo maksuja ja paperiversion jakelua.

LEM 161 – JPI:N OSUUS 1.1.-5.1.2002

JPI:n laitteet: NRD-535 ja Ten Tec Delta II (Tnx TAT) sekä minidisc laitteet sekä LEM antennit

Olin menossa TRE:n kanssa Lemmenjoelle vasta 5.1.-12.1.2002 mutta lentolippuja ostaessa sain tietää että saisin liput puoleen hintaan jos menen Lemmenjoelle viikonlopun ulkopuolella. No, ostin lipun 1.1. lennolle ja luotin siihen että tällainen nuori, komea ja sinisilmäinen poika löytää majapaikan pariksi yöksi viimeistään jonkun ystävällisen naisen luota. No, tähän vaihtoehtoon en joutunut turvautumaan vaan sain tietää AHE:n olevan yksin pediksellä ja kun hänelle mukaan tuloni pariksi yöksi sopi niin aloitin pedikseni jo 1.1. No, AHE nouti minut ystävällisesti 1.1. klo 13 Ivalon lentokentältä josta hänelle vielä kiitos. Koska meillä ei ollut keijä, ei meillä ollut suurempaa kiirettä kuuntelemaan vaan kävimme kaupassa ja Lemmenjoelle saavuttaessa en poikkeuksellisesti ensimmäisenä laittanut radiota auki vaan lähdin Kristiinan kanssa kaffeelle. Sitten alkoi viisipäiväinen kuunteluputki jonka keleistä seuraavaksi havaintoja:

- 1.1. Syvältä
- 2.1. Paikasta jonne aurinko ei paista
- 3.1. Hanurista
- 4.1. Perseestä
- 5.1. Revasta

Ainoa valopilkku (= jotenkuten kuuluvaa) oli Ibsut joita sitten kytistelin pari tuntia aamusta ja kuusi tuntia illasta. Yli 10 uutta ibsua jäikin haaviini ja pari muuta vastaan tullutta asemaa.

Ibsukuunteluun tuli ansaittu ja mukava tauko kun 5.1. aamupäivästä lähdin eräopaskaverini kanssa hakemaan Reiniluotoa Ivalon lentokentältä. Matkalla poikkesimme Inarin hotellin kuppilan kautta velkomassa 900 markkaa tai poroa...

Näin loppui kohdaltani LEM161 ja pian alkoi LEM162, mutta siitä kirjoittaakin sitten TRE aikoinaan lisää... jatkuuko ibsurevitys? , mitä Reiniluoto sanoo kun kuulee reissun ensimmäisen intialaisen? , tuleeko vuosituhannen jenkkelit? , mitä unta JPI näkee? , kuka on mystinen nainen Lemmenjoen tiellä? , Mitä tekee Roope? näihin ja muihin kysymyksiin vastaa Clusive lähiaikoina. Pysy tilaajana. –JPI -

Tässä pitkästä aikaa juoruavustus. Syksyn aikana vastausrintamalla oli melko hiljaista. Osaksi tähän vaikutti kova kiire opiskeluiden parissa, mutta myös huonot kelit sekä muutto

uuteen asuntoon. Lisäksi pernaruttokirjeet säikäyttivät niin dx-kuuntelijat kuin radioasematkin. Joulukuussa tuli käytyä JP:n kanssa Lemmenjoella. Kelit olivat näin maksimiaikana varsin epävakaa, mutta sentään kohtuulliset. Monet ovat tällä kaudella joutuneet palaamaan Lemmenjoelta lähes tyhjin käsin. Näin ei sentään kummallekaan käynyt, vaan pengottavaa riittää vielä pitkäksi aikaa. Muutamia mukavia asemiakin on jo löytynyt. Loki ilmestyy kevään aikana.

12.1-25.1 on sitten LEM 163 PÄ'n kanssa edessä. Viimeisten kuukausien jatkuvat protonimyrskyt ja korkea solar flux tekenevät sen että tänä vuonna löytyy myös pediksen aikana aikaa nukkumiseen. Ohessa viimeisimmät vastaukset.

These are my AM verifications from the last part of 2001. The year 2001 was a good one, the fifth year in a row with more than 300 verifications (1997: 326, 1998: 347, 1999: 314, 2000: 351 ja 2001: 345), but still the main challenge - one QSL per day - remains a dream.

Algeria back on longwave. The longwave radio broadcasting centre in the Tipaza Province, on 252 kHz longwave, is reopened after being closed for six months for renovation works, as reported by Algerian TV. The renewal of the equipment and transmitter of this station, which began transmissions in 1972, has become a necessity after its deterioration as a result of natural causes such as sea salt, humidity and dust which had affected the quality of transmission.

INDONESIA

Here are a few notes about the stronger stations audible in Jakarta.

Some of the private stations are hard to identify, with infrequent announcements, poor audio, irregular and often short operating hours, drifting frequencies and a lack of comprehensive and up-to-date references. The names are given as I've heard them on air, there are probably longer official names in existence for many. Banten is a new province consisting of the former parts of West Java to the west of Jakarta. Many of these frequencies are a bit off-channel, I only note the really bad ones with a 'v'.

558 Radio Swara Angkasa, Pandeglang, Banten
603 strong signal but operating very irregularly, only ID heard is Radio 68H (enam-delapan-ha) which is a satellite-delivered news service, maybe they are testing a new MW frequency for Jakarta? (www.radio68h.com)

612 Radio GNJ, Rangkasbitung, Banten
648 Radio Bestari, Sukabumi, W Java
684 Radio Suara Pratita, Sawangan (Bogor), W Java

738 Radio Bharata, Tangerang, Banten
756 unid, Karawang, W Java (listed name is Radio Virgin). - I've confirmed the ID for the station I previously reported, it's 'Radio Virgin'
792 Radio Laria, Rangkasbitung, Banten
855 unid, operates 0345-1700, ID could be something like 'City Radio', 'Sidi Radio?', audio rather distorted during speech portions
864 Bogor area, ID sounds like 'Radio BOS' or 'Radio Boss'. Announced location is Bogor, but

I think the transmitter must be located outside Bogor city judging by the signal strength there. Another station in Bogor is operating intermittently on 873v. R.Sipatahunan (Suara Bogor) is listed on 873, but I have been unable to catch an ID.

882 Radio Pelangi Nusantara, Jakarta

936 Radio PS2C, Jakarta

963 Jakarta, a new station is on with intermittent test transmissions at present. The ID seems to be 'Satu Indonesia Satu' (an Internet search suggests this is the name of a TV programme on the RCTI TV station, maybe there is a connection).

972 Radio ADS, Sukabumi, W Java

999 RRI Pro 4 Jakarta

1044 unid with Christian programming / Western rock & roll, possibly Purna Yudha, Bekasi, W Java but it never seems to ID

1061v Radio Cendrawasih, Jakarta (I think this is Cendrawasih Pusat, listed in WRTH on 1386 if I recall correctly)

1098 Radio Swara Mahasiswa Tarumanegara (Voice of Students of Tarumanegara University), Jakarta

1114v Radio Adhika, Tangerang, W Java

1134 Radio Kauman, Bogor, W Java

1152 unid

1170 Radio Elpas, Bogor, W Java

1206v Radio Historia Gita Jaya, Tangerang, Banten 1206-1208v

*1215 RRI Jakarta Pro 5 is still being announced, but at present is on FM and SW only, 1215 is off air.

1242 Pro 1 RRI Bogor, W Java is off air in local evening, and usually signs off at 1000 (perhaps they have given up the fight with Voice of Vietnam Ext Sce on this frequency after dark). The parallel FM frequency 94.25 MHz

continues until 1700. 1242 is the only RRI Bogor MW frequency that appears to be active, several others are listed in WRTH-2001 but are not heard.

1260 unid, very irreg

1277v Radio Tegar Beriman, Bogor
 1308v unid
 1332v RRI Pro-3 Jakarta, retuned in past few days to 1332v from 1334v, intermittent distortion
 1377v unid, Sukabumi, W Java; ID sounds something like 'Radio Pesona Asturia', 1377-1380v
 1404v unid
 1422v unid
 1446v Radio AWN, South Jakarta, 1445-1446v (believe this is a station I've mentioned before and thought might have been in Cirebon)
 1460 unid, announced freq is 1458; very tentatively, ID could be Radio Satu something Jakarta; sounds like it's located on a poultry farm judging by the background noises
 1485 Radio Suara Jakarta
 1508v unid
 1557 unid, very irregular
 1584v unid, sounds like 'Suara Manggala', 1578-1584v
 1602v unid, sounds like 'Always Radio Jakarta' (?very tentative), 1600-1602v (Alan Davies, 14, 20.11.2001)

936 R. Kelana Sumbangsihku, Bumiayu (Central Jawa), unlisted station. (Juichi Yamada, Japan in Jembatan DX 120, 4 November 2001 via HCDX 5.11.2001)MV-Eko

THAILAND

The military was told to explain why it wants to retain its broadcast frequencies and prevent them from being redistributed, said defence spokesman Lt-Gen Surapan Phumkaew. He said Defence Minister Chavalit Yongchaiyudh ordered the military to set out its reasons and submit them to the National Broadcast Committee and the National Telecommunications Committee.

The committees were neutral regulatory bodies charged with distributing frequencies and supervising radio and television businesses. The spokesman said Gen Chavalit ordered a panel be set up to find out why the military should keep the frequencies. The armed forces were given a month to convey their reasons.

- The military must be able to convince the public of the benefits to be had if it continues operating the frequencies, he said.

The spokesman said the Defence Ministry would probably try to retain all 202 radio frequencies, including two television stations. Of these, three radio stations belong to the defence permanent secretary's office, 14 radio stations to the Supreme Command headquarters, 126 radio stations and television channels 5 and 7 to the army, 21 radio stations to the navy, and 36 radio stations to the air force.

Lt-Gen Surapan said the military wanted to maintain the stations to safeguard national security and protect the public interest. He said the navy wanted to keep its frequencies to assist in its many duties at sea and he pointed out current frequencies were far from sufficient.

- This may sound intangible but maximising security benefits the public in ways which cannot be measured in monetary terms, Lt-Gen Surapan said.

- The military would be obliged to prove the frequencies were put to good use and open its books to public scrutiny, the spokesman said.

A ministry source said Gen Chavalit ordered the armed forces to report income generated from the management of frequencies.

Gen Chavalit said the media and academics exaggerated when they estimated the income amounted to hundreds of millions of baht. He said the income was much less and the basis for calculation might have been inaccurate.

The frequencies should not be viewed as the military's ``treasure trove", he said, and a public relations move would be initiated to show the military's dedication to using the frequencies to serve the public. Lt-Gen Surapan said the armed forces might return some of the frequencies to relevant committees but the details have yet to be fleshed out.

Tällaisiakin verifiointit ovat nykyään

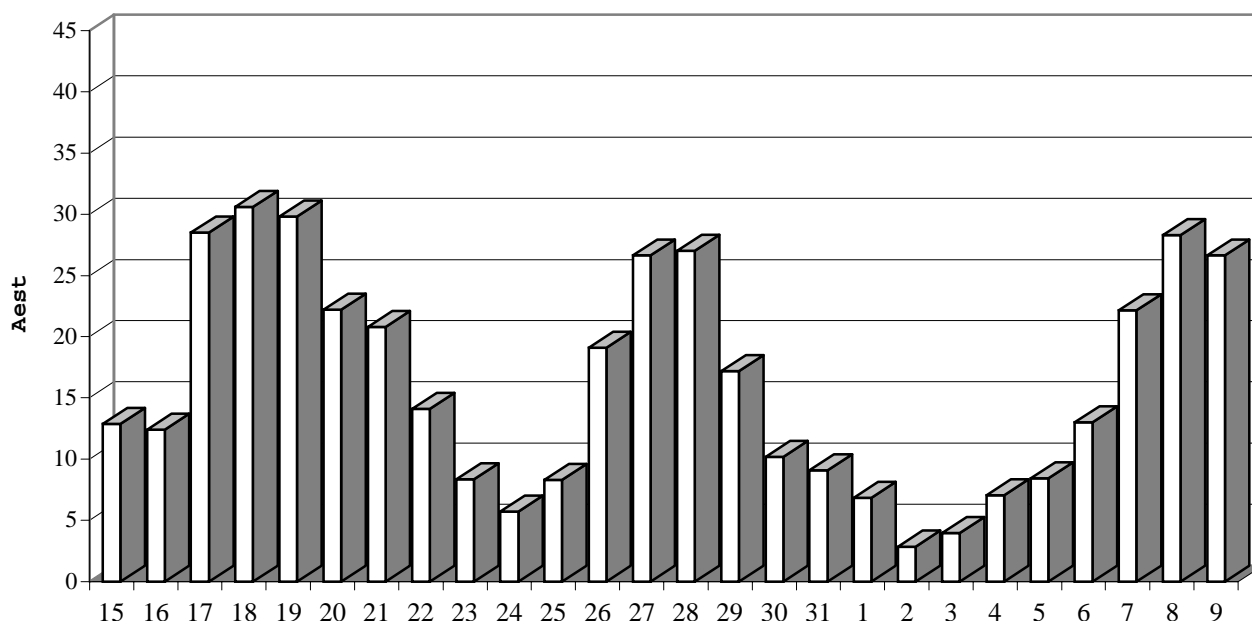

Chitinskaya GTRK:lta tänään f/upiin tullut e-mail-verifiointi kuvaa asemien yhä nihkeämpää suhtautumista raportteihin ja kannustaa siirtymään pelkästään bongauslinjalle. Enää ei aina ole edes teeskenneltyä innostusta aseman kuulumisesta Suomessa, jota olisin edes tältä odottanut (ei ole varmaan saanut kauempaa

viime vuosina raportteja kovin paljon). Suora käännös:

"Pahoittelemme vastauksen viipymistä. Pidin viestiänne aluksi vitsinä. Radiomme taajuudet ovat 66320 kHz - ULA ja 261 kHz - PA. Olette kuunnellut asemaamme (en vain pysty ymmärtämään miksi tämä tieto on teille tarpeellinen). Hyvää alkavaa vuotta".
