## LEM221 - pedition Lemmenjoelle 7.-14.1.2006

Osallistujat: Håkan Sundman (HS), Helsinki  
Hannu Tikkanen (HAT), Espoo

Laitteisto: riittävästi NRD 525 & 535D-vastaanottimia, WinRadio, MD-tallentimia

Kyseinen reissu oli poikkeuksellisesti HAT:lle kauden toinen, ja HS:lle puolestaan kauden toiseksi viimeinen. Kelien yleisluonnehdintana voidaan sanoa, että kyseessä olivat hyvin tavanomaiset keskitalven kelit; ei mitään erityistä kelihiippua, mutta asemia kaikilta ilmansuunnilta säällisin signaalein. Iberialaiset jäivät nyt vähemmistöön, vaikka lähes kaikki RNE5- ja RNE1-breikit kuunneltiin koko viikon ajan tiedostaen että nämä asemat voivat pian olla muistoja menneiltä ajoilta (uutispalstojen RNE5-tietoihin liittyen). Saldo jäi kuitenkin

olemattomaksi, eikä lokiinkaan viitsi kirjoittaa taajuuksien tavallisimpia asemia, koska ne ovat jo tilastoituneet muutenkin. Sama koskee itse asiassa kaikkia maanosia: varsinkin sellaisia asemia, joita kuunneltiin jo lokakuussa, ei ole nyt välttämättä listattu tähän lokiin.

Aasian suunnalta kuunneltiin perinteisesti japseja, joiden kohdalla kelit osuivat peräti kahtena päivänä niin aikaiseen kellonaikaan, että erittäin harvinainen klo 1000 UTC NHK1-idauspaikka oli mahdollinen. Valitettavasti antennin seinäliitettä alkoi pätkimään noin 6 minuuttia ennen tasaa ja tuli kuntoon vasta aikamerkin jälkeen, eli sekä regionaalibreikki että kutsukirjain-idit menivät metsään! Aika käsittämätön tuuri...No, toisena päivänä asiat menivät paremmin putkeen, ja idit tallentuivat niin kuin pitääkin. Muuten Aasia jäi hyvin vähäiseksi.

Oseanian puolelta ei oikeasti odotettu mitään merkittävää, eivätkä kelitkään kummoisempaa tarjonnet. Muutama tavallinen x-bandin auzzi kuului huonoilla sinkuilla, muuten kelit olivat nollassa.

Pohjois-Amerikan osalta asemavalikoima oli aika tyypillinen keskitalven selektio, eli erittäin paljon tavallisia asemia Suurilta Järviltä, joiden joukosta etsittiin uusia asemia, välillä jopa mukavin tuloksin. Parit iltakelit piristivät kummasti menoa, ja muuten parin taajuuden tehokkyttäys antoi mukavia tuloksia. Daytimereita kuultiin neljä, tosin tällä kerralla ei yhtään sieppausta illalla vaan iltapäivän keleillä.

Keski-Amerikka oli keleiltään vaisumpi kuin yleensä, Meksikokin jäi todella vähäiseksi. Etelä-Amerikkaa kuunneltiin ainoastaan, kun muilta töiltä ehti.

Reissu täydensi erittäin kivasti kauden raporttivaldoja ja sekaan eksyneet mukavat sieppaukset lämmittivät mieltä. Siis onnistunut reissu kaikin puolin, jälleen kerran. (HAT)

Westdeutscher Rundfunk ordered two 100 kW mediumwave transmitters (plus two 50 kW auxiliary transmitters) from the former Telefunken, now Transradio company. At present testing of these transmitters is wider way at the Berlin workshop of Transradio while the staff of the Langenberg station provisionally moves the existing transmitter (Siemens 200 kW, installed around 1980) out of its place to make room for the new equipment. One of the new 100 kW transmitters is meant for 720, the

other one for 1593. The former 1593 antenna equipment still exists at Langenberg in operational condition, so a reactivation of this frequency appears to be no big challenge. So far it is unknown who will or could use 1593 at Langenberg again. The transmitters are DRM-ready, but Westdeutscher Rundfunk staff does not dare to foretell if they will be ever used in this mode (short tests disregarded here of course). An addition re. Telefunken: The remaining into Transradio came into force as of January, and it is clear now that they were indeed forced somehow to give up the Telefunken brand (Kai Ludvig, Germany, DXLD).

21 March at 1805 noted Voice of America program "Borderline Crossings" on 1350. And during the program, host Larry London mentioned

that program can be heard also "via RTI in Europe". So, Radio Tatras International (mw transmitter in Kuldiga, Latvia) is retransmitting VOA's program. Their website [www.rti.fm](http://www.rti.fm) shows "Larry London Voice of America" at 1900 CET. I guess Borderline Crossings is scheduled at 1500 UT on VOA. Radio 747AM to revert to old name of Radio 5  
The public radio network Currently known as 747AM will revert to its old name, Radio 5, and undergo a major change in profile. That's the most significant change in the radio strategy document published today by the Board of Management of Dutch public broadcasting. The changes to 747AM will account for around half of the 13 million euro per year savings that must be made across the public radio networks. The Board of Management describes the 'new style Radio 5' as a "colourful network in which outlooks on life, education and accessible Music will be heard. It's hoped this will reach a bigger audience - the current 747AM rarely gets above 1 percent audience share - and make it more attractive to those aged 55 and over with a lower level of formal education.

From the start of discussions over the new radio strategy, it was always clear that most of the savings would have to be made by 747AM, as spreading savings equally across all five networks would damage all of them. Two options were initially considered: setting up a "carousel of repeats" or make major savings on the existing 747AM programming. The management decided that neither of these options would deliver more listeners, so

chose this third one. As far as the other networks are concerned, news and talk network Radio will see hardly any changes. Radio 2 will undergo minor tweaks, and 3FM will continue its present schedule. Radio 4 will be re-profiled, and as well as a broad range of classical music it will also include jazz, world music and programmes on art, culture and science. The Board of Management is now asking the various public broadcasting organisations for their reactions to the radio strategy by 15 March. (R Netherlands Media Network Weblog). MW News

Dorton Radio is now on the air on 1350 kHz mw and at

<http://www.rlsb.org.uk/dortonradio/webcast.htm>

I believe they will also have extended programmes on Saturday, commencing at 14:30 UTC. I don't know what time they are due to off on Friday evening, but normally it is around 19:30 UTC on weekdays, though on Thursdays it is at 20:00. One hour earlier by UTC of course after 26 March. Paul David via dxld yg (17/3-2006)

Earlier I mentioned the station would be on air until 2200 UTC. In fact it stayed on until 22:35, but there is a discrepancy in the announced start time for Saturday's programme, as Friday's presenters indicated a start time

of 1600 UTC, which is what is mentioned on the website, whereas Thursday's presenters indicated they would be on air at 14:30. So, best check any time after 14:30, but they should definitely be on at 1600 with Saturday Sport. Paul David via dxld yg (17/3-2006) Ydun's MW Info

OBSERVED ON SHORTWAVE**

BBC Monitoring observed a broadcast identifying  
itself as "Voice of Free Kurdistan" in progress on  
4675 kHz shortwave at 1645 gmt on 25  
March 2006, going off the air abruptly at 2002  
gmt. The programme consisted of ethnic music  
interspersed with talks in Kurdish. This is  
apparently a new station, appearing after several  
weeks of continuous music being observed on the  
frequency, typically at 1600-2000 gmt. On  
15 March BBC Monitoring identified this music as  
being Sorani [Iranian] Kurdish in origin. Source:

Mo-Fr 0110-0130 in Russian 0610-0630 in  
Koryak/Russian

irr 2210-2300, 1930-1940 in Russian
