LEM251 - Lemmenjoki 10-17 NOV 2007

YK (Yrjö Kainulainen) SDR-IQ, AOR-7030 and NRD-535 (Tnx JMS)

TAK (Tapio Kalmi) NRD-535, Yaesu FRG-100, NRD-545 and NRD-525 (Tnx TRE)

TAK listening shack at LEM251 and views from the last day before the period of darkness.

Summary as it was written daily to the <http://pudxk.blogspot.com/>

Sunday 11.11

Good cx to NA, but lots of dominants. Also some Japs, eg NHK1 local ID of JOLG 1368 at 10 UTC. First NA now audible at 19 UT, cx probably lasts again until 15 UTC. SDR-IQ found very useful despite opposite opinions! Tnx to JMS for borrowing an NRD

Monday 12.11

Good cx to NA all night and day. No trace of OC, only one HI. Japs poor. Had to get some sleep; now at 20 UTC NL's are pouring in. See, how long this lasts. Only two PNG's found active (3335 and 3905 plus carrier on 3220).

Tuesday 13.11

Conditions deteriorated in the night notably. However, some NA almost all day; mainly dominants with some

GY openings. Interesting opening towards Britain and Spain in the morning. Asia poor, except China strong (of course) . At 21 UTC some weak NL etc coming in.

Wednesday 14.11

Poor night and morning to NA . In the day some West Coast, mainly power houses. In the morning interesting BR/IB-cx up to 9 UTC. Asia nearly dead. Interference from electric fence very annoying! Apparently the coronal hole has started its effect .

Friday 16.11

Lousy night, morning and day. Towards NA mainly dominants all over the continent. In the afternoon some Philippine stations. LEM251 will return from the bushes tomorrow. Bye to all .

LEM255 – expedition to Lemmenjoki 5.-12.1.2008

Participants: Håkan Sundman (HS), Helsinki
Hannu Tikkanen (HAT), Espoo

Rigs: a couple of NRD535D, 1 NRD525, WinRadio, minidisc recorders

Not much to say that hasn't been published on the PUDXK blog. At night, common Brazilian and La Platan stations. In the morning, twice some YV HJ blended with a few CA; once we heard common east coast with a couple of Wisconsin stations – and the rest of the listening time, only Pacific Northwest and some occasional individual openings to the neighbouring states. A handful of Spaniards, a fistful of RAI regionals. Only a couple of Japs were noted on the AM-band during the whole week. No signals on x-band Aussies, which hasn't happened for the last four years until now.

EL SALVADOR:

Radio CRET which acc. to WRTH 2008 is inactive - is now on the air again - with test transmissions on its original MW frequency of 1080 kHz. What is more encouraging is that they emit a strong second harmonic on 2159.92 kHz. Monitored in Guatemala at 0230 UTC (Sunday night) with a strong signal which I anticipate will easily make it to North America and perhaps even Europe.

One ID is: "Desde San Salvador transmite Radio CRET 1080 kHz en su señal de prueba". They also announced tel. 26710317 in case you catch the station and want to inform them about reception.

Radio Imperial which used to broadcast on 17 MHz till quite recently has neither transmitter nor aerial left at the stations premises in the outskirts of Sonsonate in Northern El Salvador, so I don't think that it is very likely they will ever return. They now operate on 810 kHz with 500W only.
