Eurooppa

612	4.4.	2159-2200	LTU: Baltijos Bangu R, Vilnius. ID ja sign off. Kantoaalto poistui 2201. JTS
666	6.4.	2200-	GRC: ERA R Kosmos. Ensimmäisen kerran sattui tämä korviin. Tätä siis releoidaan tässä öiseen aikaan. PUL/R
675	6.4.	2050-	HOL: R Maria Nederland, Lopik. Tuli pitkään lähes puhtaasti. Taajuuden NRK poissa (tai kelien heikentämä). JTS
927	10.4.	2200-	GRC: ERA Kosmos, Zakynthos. Yllättäen kuului myös täällä // 666 kHz. PUL/R
1197	8.4.	1815-	ROU: R Neumarkt, Brasov. Regionaaliin saksankieliseen ohjelmaan sisältyi myös pätkä Deutsche Wellen ohjelmaa. PUL/R
1296	6.4.	2200-	SRB: RTS Beograd, Vranje. Vielä löytyy serbejäkin bandilta. "Radio Beograd, prvi program". PUL/R
1602	3.4.	1823-	FIN: SWR Virrat. Heikko. QRM: R Seagull. JTS
6170	3.4.	1054-	FIN: SWR Virrat. Heikohkosti. Painui "kuopissa" kohinan rajoille. JTS

Piraatit

6925	8.4.	1930-	GRC: Spider R. S-3 ja nyt mukana ehdottomasti vain ylempi sivukaista. Tuttuja poppeja sekä spider.sw@hotmail.com ei-live kuulutuksia. Erikoisuutena yhdessä välissä 3 minuuttia datapulputusta (digitaalinen SSTV-ID?). JKR
6925	5.4.	<u>-2100</u>	GRC: Spider Radio, Athens. Spider on taas äänessä joka ilta, nyt AM-modulaatiolla. Uskomaton signaali vain 30-40 watilla mutta seuraavana iltana erottui juuri ja juuri. Vihjasin japseillekin jotta kokeilisivat. Lopettaa aina "Il silenzio"-kappaleeseen 21utc. HKU

Brittein saaret

963	8.4.	2235-	G: Buzz Asia, London. Mainoksia ja promoja Englannin kielellä. Näin maallikkokuuntelijan kannalta ohjelma oli samanlaista kuin edeltäjälläänkin (Club Asia). PUL/R
1161	7.4.	1918-	G: Magic 1161. Tuurinkantamoinen: Olin lähdössä nukkumaan ja pyöräytin siinä lopuksi reippaasti viritysnuppia. Nuppi pysähtyi tähän ja korviin alkoi tulla taianomaisia promoja ja mainoksia kerrassaan loistavalla kuuluvuudella. Paluu todellisuuteen tuli sitten parin minuutin päästä, kun tämä häipyi pois ja alta alkoi tulla arabiaa. Eikä samanlaista kuuluvuuspiikkiä tullut uudestaan ainakaan seuraavaan kolmeen varttiin. Tyypillistä briteille, siis. V/s Darren Lethem (darren@magicradio.com) sähköpostilla kolme (!) päivää siitä kun laitoin tavallisen kirjeen keltaiseen postilaatikkoon Tampereella. Kunnon toimintaa. JKR
1197	14.4.	0400-	G: Absolute Radio. Tämä Wallaseyn lähetin ehdottoman pielessä eli n.+35Hz. MSO

666	10.4.	2200-	E: SER R Barcelona. SER -asemat näyttävät lähettävän paikallisbreikkejä myös viikonloppuisin. Nyt breikki heti klo 0200 SA jälkeen, kun yleensä juuri ennen. PUL/R
666	4.4.	2205-	POR: Tentative: RTP Antena 1. Puhui portugaliksi, ei ID. QRM: espanjalainen. JTS
792	8.4.	2259-	E: SER R Sevilla. Päihitti välillä ranskalaisen. PUL/R
837	10.4.	2200-	E: COPE Sevilla. Vanha tuttu vuosien takaa. Taitaa lähettää omia ohjelmiaan pitkin iltaa. PUL/R
990	8.4.	2259-	E: SER R Bilbao. Paikallis-ID taajuudella, jota ei useinkaan Ibsu -keleillä tule tsekattua. PUL/R
1026	8.4.	2259-	E: SER R Jaen. Kuului vähän vaisummin kuin saman taajuuden Reus. PUL/R
1026	8.4.	2235-	E: SER R Reus. Oli ehtinyt jo unohtua, että tämänniminenkin SER -asema on olemassa. Joutui ihan listoista katsomaan, mitä IDissä oikein sanottiinkaan. PUL/R
1080	9.4.	2200-	E: SER R Huesca. Päätti breikin idiin: "Radio Huesca, en 1080 de onda media, cadena SER". PUL/R
1116	8.4.	2235-	E: SER R Pontevedra. Kuului yksinänsä paikallisbreikillä. PUL/R
1134	9.4.	2159-	E: COPE Astorga. ID breikin päätteeksi: "COPE Astorga 1134 onda media". PUL/R

1179	9.4.	2159-	E: SER R Valencia. Radio Sweden lopetti .59 ja tämä jäi yksin taajuudelle. ID: "Radio Valencia 1179 onda media y 100.4 FM". PUL/R
1224	9.4.	2156-	E: COPE Lleida. Nätti idi heti breikin alkuun: "COPE Lleida 1224 onda media i 99.7 FM. COPE Lleida - la radio mas propera". PUL/R
1224	9.4.	2156-	E: COPE Lugo. Ehti idaamaan ensimmäisenä, ennen kuin taajuuden muut asemat pääsivät breikille mukaan. PUL/R
1260	10.4.	2200-	E: SER R Algeciras. Taisin kuulla tämän eka kertaa. Murcia aina ollut breikillä päällimmäisenä, nyt tämä. PUL/R
1260	8.4.	2235-	E: SER R Murcia. Mainosteli paikallista Renault -liikettä. PUL/R
1287	9.4.	2155-	E: SER R Castilla. Aloitti breikin sopivasti idillä: "Radio Castilla de Burgos, 1287 onda media, 97.1 FM". PUL/R
1287	8.4.	2259-	E: SER R Lleida. Todella lujaa. ID paikallisella murteella. PUL/R
1296.3	7.4.	2155-	E: COPE Valencia. Taajuus pahasti pielessä. Liekö kuitenkin väliaikaista. PUL/R
1539	8.4.	2235-	E: SER R Manresa. Ensimmäistä kertaa kuulin nyt tämän paikallis-IDilä. Elche ei kuulunut juuri ollenkaan. PUL/R

Family Radio Tartus on 1035 kHz has been renamed Radio Eli (Eli = My God) due to the wish of Family Radio. Programming on 1035 is shared with TWR. Building will also start soon, weather permitting, of a second transmitter.

GERMANY

Radio Bremen 936 is off air since Wednesday, and it seems to be forever as mentioned in a newspaper article. They just test it and if complains are being received they will reconsider. However they have

large financial problems and already started to join administration forces with NDR.

I suppose very few listen to 936, and I am glad to have one pest less.

Antenne Saar is a special German-French information program launched in December 2005 by Saarländischer Rundfunk (SR). The programming consists largely of retransmissions of other SR programs. But every hour during the day there's French language news from Radio France Internationale (RFI), as well as other broadcasts of RFI and Radio France. The transmissions take place in DAB and on Medium Wave on 1179 kHz via 10 kw transmitter in Hausweiler. Up till 2nd of November 2009 the schedule was 7:00-17:00 UTC but it's now expanded to 24 hours. SWR Ulm Jungingen in AM mode on 711 kHz til March 8th, silent on March 9th, move to new 1413 kHz from Wednesday March 10th, 2010.

SWR Heilbronn Obereisesheim remains on 711 kHz, and will get a new DRM mode capable unit in near future. At present the AM unit is faulty and a lower power reserve unit is in use. I guess Obereisesheim will be used only at night time from 2300 to 0400 UT in DRM mode then ... but furthermore still on AM Mode at 0400-2300 UT.

MADEIRA

Back in Jan'09, the folded monopole used for 531 kHz 10 kW at Pico das Eiras, Porto Santo island, was destroyed in a storm. Being a tower of this type, it meant it could be used as a mast for the VHF-FM antennae too, and it was indeed the case. A new tower for these antennae was erected soon after that. This RTP-radio facility is located west of the this island.

I have just been informed that the RTP administration decided not to reactivate the MW outlet since full coverage is being accomplished by VHF-FM.

Now it remains to be seen whether the Pico do Areeiro tx 603 kHz 10 kW, Madeira island, has the same fate. The tower collapsed two days prior to the recent sad events in Madeira when floods and mud slides destroyed property and killed some 40 people. Pico do Areeiro is located north of the capital, Funchal.

RUSSIA

Radio Rossii broadcasting reductions on SW. It is not Radio Sweden, but nevertheless lamentably ... It seems some of Radio Rossii SW transmitters will leave the air for good starting tomorrow due to stress of money.

I do not have all info yet but among these for a long time usable ones will be:
5930 Murmansk (0100-2100 UTC during the summer seasons),
6085 Krasnoyarsk (2100-1700),
6160 Arkhangelsk (0100-2100),
6195 Ulan Ude (2100-0100), etc.

I am listening now Radio Rossii on 5930 kHz and cannot still believe that March 27, 2010 will be the last day of SW relays from Murmansk ...

Date correction: all changes will be in use starting from May 8th !
(Mikhail Timofeyev-RUS, hcdx March 27)

Last minute info: almost all Radio Rossi relays on SW do not stop starting from March 31st (1700 UTC) as I wrote yearier. These relays includes:

5930 0100-2100 50 RV-790 Murmansk
5940 1700-1300 100 RV-1001 Magadan
6075 1700-1300 100 RV-658 Petropavlovsk-Kamchatsky
6085 2100-1700 50 RV-98 Krasnoyarsk
6100 2100-1700 5 Kyzyl
6160 0100-2100 2x20 RV-300+RV-297 Arkhangelsk
6195 2100-1700 50 RV-44 Ulan Ude
7320 1700-1300 100 RV-647 Magadan

Also Moscow's Radio Rossii relays to Europe on

12070/13665/9410/7220 kHz
by sessions between 0100 and 2100 UT will be continued.

It seems 65th anniversary celebrations of Victory in the Great Patriotic War is the main reason to keep SW relays till this date at least ...

SWEDEN

Radio Sweden will terminate its medium and short wave broadcasts this October 31st in favour of web services – with Swedish Radio management stating that is the best use of resources and in line with international trends.

The English-language service is to continue on the web and on national broadcasts.

The Russian output will be available on the web as is the German now.

Among the immigrant languages, Albanian, Assyrian-Syriac and Bosnian-Serbian-Croatian are to be terminated on the same date. Meanwhile, Arabic and Somali – the largest immigrant language groups here at present – are to be boosted. The same applies to Romani – one of Sweden's five official minority languages.

The Persian service is to include even Dari spoken by the rapidly increasing number of Afghan refugees coming to Sweden. Kurdish broadcasts remain unchanged.

Swedish Radio's output in immigrant languages will be available on the web and broadcast nationally.

UNITED KINGDOM

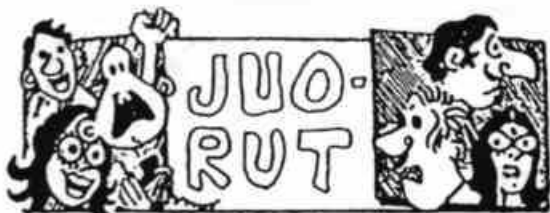

Sunshine Radio's Worcestershire service on 1530 AM has closed down this afternoon, RadioToday.co.uk has learnt.

Sister stations sharing the same name in Ludlow and Herefordshire/Monmouthshire are unaffected by the move.

The station is closing because Classic Hits Radio Ltd, its previous owner, is being dissolved before the new owners had time to transfer the licence. The station was previous operated by Laser Broadcasting which has also gone into administration.

A spokesperson for Sunshine Radio confirmed stations in Ludlow and Herefordshire/Monmouthshire will continue as normal, and it was unfortunate that a legal and technical issue meant

the Worcester service had to close.
It is hoped all staff at the station will be re-deployed elsewhere within the group.
