6310	2.5.	0607-0626	SWE: Junkbox R. Lähes kuuluttamattomalle musiikille on kyllä mielekkäämpiäkin kuuntelutapoja kuin lyhytaallot. Laitoin maaksi Ruotsi, koska useampikin johtolanka viittaa sinne. JKR

NORWAY

Time Signal Will Be History On NRK Radio.

NRK Radio has decided to drop their time signal, sent weekdays at 1300 local and weekends at 0800 local. The main reason is that DAB and Internet signals are delayed, so the purpose of giving the correct time is more or less gone. (Bjarne Mjelde-NOR, dxld Apr 22) Topnews

SPAIN

Radio station EAJ25 is no more "Radio Tarrasa" (or Terrassa in Catalan language). Radio Tarrasa-SER Vallés was closed on January 30th and all its workers were fired. The station was owned by José Manuel Salillas who sold it in 2008 (with the FM Radio Club25, the TV station "canal TV20-Localia Vallès and the magazine "Terrassa Societat") to the KISS-FM group. After the Cadena SER decided not to renew the contract of association with the new owner (SER and KISS are direct competitors in the musical FM scene and a condition for membership is that the partner can not compete directly with the brands of the network and KISS-FM is doing it) KISS-FM.

After the last broadcast as "Radio Tarrasa", the MW station (828 kHz) spent several days in an unstable situation ... sometimes switched on other off, sometimes relaying the SER satellite fed other the KISS-FM one. At the end, radio station EAJ25 has become a relay of the FM frequency of KISS-FM in Barcelona. So, update your lists! 828 is no more "Radio Tarrasa" but "KISS-FM Barcelona" relay.

CÁCERES. EAK57 (900 MW) is no more "COPE-Cáceres" but "COPE-Alta Extremadura".

"COPE-Cáceres" is reserved now for the FM outlet. "COPE-Alta Extremadura" focuses its programing in the North of the province specially in the economically attractive market of Plasencia (where there was a Radio Popular station in the 60's EAK61)... and very suspiciously the 900 kHz signals has suffered a dramatic improvement in Plasencia city. Plasencia is @83 km. North of Cáceres city. The MW signals of RNE and (previously!) COPE were weak. RNE-1 774 the stronger and RNE-5 1107 the weakest. The last time I passed by the streets of Plasencia in the bus heading to Aldea del Cano (where my Perseus is) the scene was totally different: 900 AM with a

LOCAL signal and RNE with the signal level expected... so I am suspecting that the Pirate's ship is starting to cruise the Spanish (medium) waves also (in the FM there is little room already!).

AUSTRALIA: "I hear that some of the transmitters decommissioned by CVC at Darwin may be going on to useful second (third?) lives: two 100 kW could

wind up at Radio Australia, Shepparton, if rather expensive shipping costs of a megadollar can be covered. RA may also be getting a 300 kW transmitter, DRM-capable, and some new antennas to serve Africa and SW Asia. Some other equipment from Cox Peninsula has already been donated to HCJB Kununurra (Glenn Hauser-OK-USA, dxld Apr 8)

Well, yes, two 100 kW SW transmitters from CVC Darwin will replace two 100 kWers at SHP site. I know one higher powered SW transmitter from DRW will go to another CVC site, so I'd imagine would be either Zambia or Chile.

Yes, SHP is take delivery of a new DRM SW transmitter. It will be essentially used as a feeder SW transmitter to feed local transmitter stations in the Asia Pacific region like RNZI does at present with its DRM SW transmitter. Again I would have to imagine on designated SW broadcast bands. These changes are expected to occur in around six months time.

I would be interested to know who suggested new antennas at SHP site. This is news to me, particularly as Radio Australia is a regional broadcaster and not a global broadcaster and RA doesn't target Africa any more (not since early 90's). (Ian Baxter, Australia, dxldyg via DXLD)

PAPUA NEW GUINEA: 3290, R. Central with relay of "Radio Gadona" "Central 95.5 FM", 1237-1401*, April 19. R. Gadona is a new FM station that started this year

to provide coverage for the Central Province. Very enjoyable listening! Audio attachment of ID and schedule (Ron Howard, Asilomar Beach, CA, Etón E1, via DXLD)

Listening to my audio clip some more, I can now make out several "N-B-C Central" IDs, as well as the "Radio Gadona" and "95.5 FM" IDs. Maybe others can pick out even more details (Ron Howard, DXLD)
