1080	3.10.	2159-	- "R Huesca onda media" K9AY toimii mainiosti, vaikka normaalia pienempi. MDK
1116	3.10.	2155-	E: SER R Pontevedra. Breikin alkuidi "R Pontevedra, cadena SER", sitten vain hetkittäin pinnassa. Vahvemmin kuitenkin kuin 2058 breikillä. JVH/N

## Aasia

540	15.10.10	1440-	THA: Yan Kraw 5-4-0, Bangkok. LEM293
549	12.10.10	1500-	VTN: VOV2 Hong Yen. LEM293
558	12.10.10	1430-	CHN: Fujian Xinwen Guangbo. LEM293
567	15.10.10	1440-1505	LAO: Lao National Radio, Vientiane. ID: "Sathani

684	12.10.10	1356-	Withayu Krachaisiang Hengsat". LEM293 CHN: Tangshan PBS. Pariinkymmeneen aktiivisesti kuunneltuun minuuttiin mahtui ainakin 7 idiä: "Tángshan rénmin guangbò diántái xinwén zònghé guangbò". Puolta tuntia myöhemmin asema, joka kuuluttaa ensin FM-taajuuden ja sitten AM-taajuuden, selvittely vielä kesken - Tangshan kuulutti taajuudet toisin päin. Näitten selvittely on dx-salapoliisityön vaativimpia ulottuvuuksia, mutta yllättävän paljon apuja löytyy netistä kun vaan jaksaa mankeloida. Aikaa palaa, ja seuraava pedis on jo painamassa päälle. LEM293
684	12.10.10	1415-	PHL: DYEZ Bacolod. "Aksyon Radio". LEM293
774	15.10.10	1456-	TWN: Taiwan BC, Taichung. LEM293
855	12.10.10	1400-	<b>TWN: Min Pen BC, Taipei.</b> "Cheli shih Min Pen kongsi kon po tientai". Kylläpä tätä taajuutta on hierottukin tämän toivossa. Mannerkiinalaiset ovat vieneet sata nolla aikaisemmin voiton, mutta nyt tuli työvoitto. LEM293
864	3.10.	1500-	<b>THA: R Thailand, Phattalung/Sisaket/Tak.</b> "Sathanii Witthayu Krajaisiang Haeng Prathet Thai". Samaa ohjelmaa kuin 891. Laitetaan nyt alleviivaus, kun ei ole Thaita OLL:ssa tällä taajuudella lokattu. AIH9
882	15.10.10	1340-	CHN: Dalian Diantai Xinwen Guangbo, LN. Aika mukavaa kiinalaistykitystä tällä taajuudella! LEM293
882	15.10.10	1403-	CHN: Shenyang Guangbo Diantai Jinji Guangbo, LN. Kuulutti myös taajuudet FM 904 ja AM 882. LEM293
882	15.10.10	1500-	CHN: Shijiazhuang Xinwen Guangbo, EB. Taajuudet AM 882 ja FM 88.2 kuulutettiin. LEM293
891	12.10.10	1400-	TWN: BCC Tainan. "Tiyon Gok Kon Po Ko Shih, Tainan Kon Po Tien Tai" on aseman idi eli edelleen paikallislähetä on säilynyt tässä. LEM293
999	3.10.10	1504-1509	INS: RRI Jakarta. Punnersi esiin venäläisen ja kiinalaisen alta niin, että kuului yhden minuutin lähes yksin taajuudella. Tasalta ja vartin yli oli normaali meininki, eli venäjä-kiina soppa kuunneltavana. LEM292
999	12.10.10	1425-	PHL: DYSS Cebu. "Super Radyo" & "D-Y-double S". LEM293
1008	20.9.	1600-	+ <b>CHN: Shaanxi Dushi Guangbo, Xi'an.</b> "Shaanxi Guangbo Diantai, Dushi Guangbo ... zhaoping 101.8 MHz, zhongbo 1008 kHz". On kuulunut mahtavalla signaalilla, eli kyseessä on varmasti uusi lähetin. Otetaan plussa pois heti kun Mika löytää tämän elokuun tallenteilta, ja varmasti löytää :). AIH8/HS&JMS
1107	12.10.10	1347-	CHN: Jiaxing PBS. LEM293
1116	12.10.10	1506-	THA: Sathani Withayu Kong Thap Phaak Thii Saam "Suang Naa" (3rd Army Area). Fort Somdet Phra Ekathotsarot, Muang District, Phitsanulok. LEM293
1197	15.10.10	1300-	CHN: Qiqihar PBS, HL. LEM293
1197	15.10.10	1300-	J: JOYF IBS Ibaraki Hoso, Mito. LEM293
1215	12.10.10	1456-	TWN: Tien Sheng BC, Pengshan. LEM293
1233	10.10.10	1135-	J: JOGR Aomori. "RAB Radio". LEM293

1269	12.10.10	1330-1458	PHL: DYWB Bacolod. "Bombo Radyo". LEM293
1269	12.10.10	1325-	TWN: Radio Taiwan International. Lähetti indonesiaksi. Oli toivoa paremmastakin. Tätäkään ei kyllä löydy listoista. LEM293
1296	12.10.10	1500-	TWN: BCC News Network, Tainan. LEM293
1458	15.10.10	1300-	J: JOYL IBS Ibaraki Hoso, Tsuchiura/Sekijo. LEM293
1512	11.10.	1530-	IRN: IRIB Radio Ardabil, Arbadil. Paikallisidi. JHY
1539	11.10.	1500-	CHN: CNR1. Kelit hieman parantuneet, joten nämäkin syysasemat tulevat kuuluviin. Myös muita CNR taajuuksia auki: 981, 1377 ja 1593. Samoin taisi Vietnam 1242 kuulua. JP
1557	13.10.	1855-	TWN: Family R, Kouhu. Kuului tässä välillä hämmästyttävän lujaa. Kiinankielisessä ohjelmassa tavattiin englanninkielistä URL:ia muutamaan kertaan ja tasalta sitten "Bible reading" -ohjelma englanniksi. TTM/S
1566	7.10.	1950-	KOR: HLAZ Cheju. tuli välillä todella lujaa. Tasalta aikamerkki ja kuulutukset, mutta identiteetti piti varmistaa vielä aseman nettistriimistä. Savonlinnan etäradiota vaivannut sitkeä häiriö saatiin paikallistettua SDR-läppäriin virtalähteeseen jonka vaihdon jälkeen MW ja SW alueet ovat olleet aivan uudessa vedossa. TTM/S
1602	12.9.	1630-	<b>UNID: IRIB Semnan regional.</b> Lähetin luultavammin jossain provinssin pienemmässä kaupungissa kuin Semnanissa. MR
1602	22.9.	1630-	+ <b>IRN: IRIB Yazd regional, Bahabad.</b> Taitaa olla ennenkuulematon QTH. MR

1270	14.10.	2100-	CAN: CJCB Sydney NS. Tähän aikaan tavallisimmat NS-NL -asemat aivan huutamalla, tästä vain ei ole Karperön horisontissa ollut oikein hyviä kokemuksia.... MJ

1350	14.10.	2200-	USA: WEZS Laconia NH. Juuri ja juuri tunnustettavasti kiinalaisen (!) häiritsemänä. Hyvin imuuttaa 301-asteisen korvausinvestointi vaikka menikin alkuperäistä enemmän etelään, höh. Jos haluatte hyvän kompassimiehen ei kannata ottaa minuun yhteyttä. Tnx JSN

oravakeppimiehenä olemisesta Karperön haasteellisessa vanhassa merenpohjassa! Aamunousu meni hieman ohi kelin tiputtua nilkkoihin, 285-asteisella varmaan olisi voinut jotain herkkua löytää, enää ei Kuubasta aivan hirveästi jaksa innostua.... MJ

Vastauksessa mielenkiintoinen kohta "... I posted your letter on our bulletin board for all to see. Afterwards it will be placed in our station's public file for the next three years, per our government laws". Kuulostaa oudolta. Mitenköhän lakitekstiin mahtaisi saada osion, joka pakottaa vastaamaan erityisesti suomalaisten raportteihin? LEM/JMS

## LEM 283: 7.-14.11.2009

by Håkan Sundman (HS) and Jim Solatie (JMS) in Lemmenjoki, Finland

Those were the days! The fall of 2009 was definitely the highlight – at least so far – of our dx-career. First, a once-in-a-lifetime dx-expedition in September with truly amazing Australia openings, and then the wonderful LEM283 in November, with extremely exciting stations from Asia, North- America and Mexico.

Even though two years have passed since LEM283, we have listened through about one third of the recordings. More than half of top-of-the-hour identifications needs still to be checked, too. Perhaps we will never have time to dig everything out. Let's see ... But here are at least everything we have found out so far. Please enjoy!

1550 13.11.09 1000 + USA: KIWA Sheldon, IA. V/s wrote to us: Nice reception report! We're quite impressed -- especially since our power at that time of night is -- are you ready? -- 6 watts! That's right -- the same power as a nightlight bulb. We transmit from a non-directional antenna on the west side of Sheldon, Iowa. Most of the city lies in O'Brien County, but this part of the city is in Sioux County. I don't think we have any QSL cards -- do MF DX'ers still ask for those? I suppose we could make something up -- or type out an official QSL on station letterhead. Do you need any of these things? Also, I would like to interview you for a news story. Are you comfortable speaking English? Could we do this yet tonight? LEM283/HS&JMS

## LEM 294 16-23.10.2010

Hannu Niilekselä (HN)  
Jan-Erik Österholm (JEÖ)

After a year of intensive listening to a magnitude of files, our log is ready to be published. Still, not all files with recordings from the Central and Latin American directions have been examined and eventual new findings will be published as and when needed.

As you will note, the loggings only include the dates. Since the introduction of the SDR receivers the nature of this hobby has changed significantly. We both wish to preserve the excitement of FINDING a new station even with these new equipment.

We share all information about conditions during our expedition. But we both have examined our files independently and do not give even to each other the times of our loggings. With this method we found out that our findings were more diversified than what we had expected. This was to a large degree affected also by the fact that we had often been using different antennas in situations of only short “bursts” of interesting signals from a specific direction.

The massive amount of files created in today’s SDR environment requires new approaches to how we deal with our files created –during DX expeditions and with automated recordings. Personally we give very little credit to “DX’ing” where the finding is with one person and verifications are shared – even less for situations where files are not diligently examined, but kept more so for examination later on, based on what someone else somewhere else has reported having been heard.

For all of us it is a personal choice, how we wish to go about DX’ing, so other DX’ers may disagree with this policy. This is just fine - it is a free choice for everyone.

For Hannu our chosen policy meant, for example, the “loss” of some 10 stations Jan-Erik picked from Texas and for Jan-Erik a few from Florida and North Carolina, which Hannu found on his files. But we are happy with this, as well as the combined results of our expedition, and enjoying our hobby as much as ever !

### LUXEMBOURG

According to [an article in the local press](#) it has been decided to close Marnach transmitting site at the end of 2014.

RTL Group / CLT will then convert the site into a "data center", which will be environment-friendly ("green IT").

This is the result of lobbying and legal action taken over the last few years by local residents, who consider the transmitting site as the source of various nuisances.

The article also adds that a spokesperson for the government said that there were "no appropriate site in Luxembourg" where to reinstall the antennae...

Radio 4's Longwave goodbye - Article just published on The Guardian website:

A handful of specially crafted glass valves each measuring one metre high are all that is stopping the historic home of Test Match Special, Yesterday in Parliament and the Daily Service going suddenly and permanently off air.

BBC Radio 4 long wave, which transmits on the 198 kilohertz frequency, relies on ageing transmitter equipment that uses a pair of the valves – no longer manufactured – to function. The valves, at Droitwich in Worcestershire, are so rare that engineers say there are fewer than 10 in the world, and the BBC has been forced to buy up the entire global supply. Each lasts anywhere between one and 10 years, and when one of the last two blows the service will go quiet.

Buried in the BBC news today that they are cutting 2000 jobs, there is this item:

There will be reductions in medium-wave transmissions for local radio in England where coverage replicates FM. There will also be no reinvestment in long wave, which will lead to the end of Radio 4 on LW in the long term.
